James Hutton Institute's LEAF Technical Day for Farmers

Thursday 9 June 2016

Balruddery Farm, Angus, DD2 5LJ

Free entry

Booking essential

Following on from the first and very successful LEAF Technical Day held in 2014, and to help LEAF celebrate their 25th anniversary, the James Hutton Institute would like to invite you to join them and fellow farmers at Balruddery Farm on 9 June.

This year, the event is shaping up to be bigger and better than ever with even more displays and practical demonstrations. We will show how utilising technology and implementing less conventional farming methods can help you achieve sustainable and environmentally responsible farming practices on your own farm.

All of the speakers will take questions and are happy to compare notes with the farming community on technical approaches and farming practices.

This event is completely free to attend and lunch will be provided. There will be excellent opportunities to network with other delegates and the speakers.

Please note that there will be a lot of walking about the farm so bring wellies!

Pre-registration is essential so please book your place for this event now at [EventBrite](https://www.eventbrite.com).
