CLIMATE, SOIL, LAND CAPABILITY FOR AGRICULTURE and LAND CAPABILITY FOR FORESTRY MAP and HANDBOOKS

CLIMATE, maps, scale 1:625 000 (coloured)

Assessment of Climatic Conditions in Scotland Series.

- 1. Based on Accumulated Temperature and Potential Water Deficit, (with explanatory handbook and folded maps).
- 2. Based on Exposure and Accumulated Frost, (with explanatory handbook and flat or folded map).

Assessment of Climatic Factors in Land Capability for Agriculture in Scotland, (flat maps only). Each map covers the whole of Scotland.

Price £28.80, post and package free.

SOIL AND LAND CAPABILITY for AGRICULTURE

handbooks and maps at 1:250 000 scale, (coloured).

This series covers the whole country in seven overlapping sheets shown on the index map overleaf. Each of the areas are presented as a package consisting of a soil map, a map showing land capability for agriculture and a fully illustrated handbook. The maps and handbooks for each area are not sold separately. The maps are normally supplied folded but flat maps are available on request. **Price £57.60**, post and package free.

NB. Packages 5 and 7 are presently out of print.

Loan copies are available on request. Loan period is usually 2 weeks but extensions can be granted on request.

Handbook 8. Organisation and methods of the 1:250 000 Soil Survey of Scotland. Price. £18.00, post and package free.

Handbook. Land Capability Classification for Agriculture. Price £18.00, post and package free.

LAND CAPABILITY FOR FORESTRY, handbooks and maps, scale 1:250 000, (coloured).

This series consists of five maps on the same sheet lines and with the same titles as the soil and land capability for agriculture maps above. Sheet 3 includes an insert of Sheet 1 (Orkney and Shetland) at 1:1 million scale and Sheet 4 includes an insert of Sheet 2 (Outer Hebrides) at 1:1 million scale.

Descriptive handbooks are available for each area. They have the same number and title as the maps. Maps and handbooks are available separately.

Price per map, £28.80 post free, flat or folded. Price per handbook, £4.80 post-free.

Land Capability Classification for Forestry in Britain.

This monograph outlines the physical factors that affect forestry and provides guidelines for determining forestry capability classes.

NB. This booklet is currently out of print but colour photocopies are available which include photographs and the national classification map. Price £8.00 per copy

LAND CAPABILITY FOR AGRICULTURE MAPS coloured, scale 1:50 000

These maps cover the principal agricultural areas of Scotland. The sheet lines conform to the Ordnance Survey Landranger series. Sheets are normally supplied folded, but flat maps are also available.

SOIL MAPS coloured, various scales

Sheet titles listed in bold type are available in both flat and folded versions. The remainder are available only as flat sheets. Price, £28.80 post free.

Soil Series Description Sheets

These sheets provide summaries of the soil properties and related environmental factors for many of the more extensive soil series on the 1:50 0000 (coloured) and 1:63 360 (coloured) and

1:25 000 (uncoloured) soils maps.

It should be noted that the sheets relate to the individual soil series and are not descriptions of the area covered by the whole soil map.

Price £1.20 each.

Soil Series Description Sheets. Price £1.20 each

These sheets provide summaries of the **soil properties and related environmental factors** for many of the more extensive soil series on the 1:50 0000 (coloured) and 1:63 360 (coloured) and 1:25 000 (uncoloured) soils maps.

LAND COVER OF SCOTLAND DIGITAL DATASET (LCS88)

For up to date information or queries on publications please contact The James Hutton Institute, Craigiebuckler, Aberdeen, AB15 8QH Telephone +44 (0)1224 395000 Fax +44 (0)1224 395010 or +44 (0)1224 395035 Email: products@hutton.ac.uk www.hutton.ac.uk © 2016

This dataset is the first ever national census of land cover in Scotland . It was produced at The Macaulay Institute on behalf of SEERAD (then The Scottish Office) to assist in developing and monitoring the effectiveness of policies affecting the state of the countryside in Scotland. Baseline scale is 1:25 000. The classification system allows for 126 land cover types to be identified as point, line or area features. Area features are delineated where they are > 10 ha for semi-natural ground vegetation, > 5 ha for built-up land or > 2 ha for woodland. An important aspect of the classification system is that it allows for mosaics of the single land cover features to be identified. Mosaics are defined as mixtures of 2 land cover features where the patches of both are below the minimum mapping area criterion for separate identification. The recognition of mosaics expands the number of land cover classes from 126 to 1323.

From 1st April 2001 SEERAD and Ordnance Survey will no longer collect leasing fees for this dataset. The James Hutton Institute will act as agent for the delivery of LCS88 data. Leasing Agreements will continue to be set up for each data lease and there will be a charge for delivery of £350 + VAT for a study area or for the Scotland dataset. The setting up of leasing agreements and delivery of data is mainly carried out by email.

Note on LCS88

The Land Cover of Scotland Dataset is Crown Copyright 1992. It shall not be reproduced in any form whatever without the permission of The Controller of Her Majesty's Stationery Office. It is reproduced from OS Pathfinder Series with the permission of the Controller of HMSO.

LCS88 Executive Summary Report

Covers the aims and the production methods of the survey, the land cover classification scheme (and comparisons with other schemes), and a guide to using the statistical data. National and regional statistical summary reports are included as is a 1: 2.5 million scale colour map of Scotland showing them the land cover classes. 40 pages.

£15.60

LCS88 Main Report and Statistical Tables

Covers the aims, background, the LCS88 land cove classification system, the creation of the dataset the validation of its accuracy and conclusions and recommendations. There are chapters on the links between LCS88 and other source of land cover and ecological information in Scotland. Full statistical reports and commentaries by region are also included. The appendices include feature coding and mosaic codes, technical descriptions, validation details and national, regional and district statistical tables. 600 pages.

Price £96.00

The Measurement and Analysis of Land Cover Changes in part of the Central Valley of Scotland

This report, prepared for the Scottish Office in 1991, analyses changes with respect to interactions between agriculture, forestry, conservation and the impact of development using 3 time periods - 1946, 1964 and 1988. The area studied comprises 950 sq km of the Central Valley of Scotland and extends westwards from Livingston to Airdrie and southwards from Falkirk to Carluke.

Report Price £30.00

Digital data are also available products@hutton.ac.uk

The Measurement and Analysis of Land Cover change in the Cairngorms

This report, prepared for the Scottish Office in 1992, analyses changes with respect to interactions between agriculture, forestry, conservation and the impact of development using 3 time periods - 1946, 1970 and 1988. The area studied comprises 1000 sq km within the Cairngorm mountains and covers the bulk of the high mountain area, enclosing the National Nature Reserve, most of the National Scenic Area and part of the River Spey valley in the west.

Report Price £30.00

Digital data are also available products@hutton.ac.uk SOIL MEMOIRS

All prices are post-free.

These books contain introductory chapters on physical features, climate and parent materials. The soils are described in associations, series and complexes. Succeeding chapters contain information on vegetation, agriculture, forestry and analytical data. The appendices contain sections on the definition of terms and tables of analytical data and plant communities.

Please note that the maps referred to in each memoirs are not included in the price but if bought with the memoir will cost £18.00 each.

The Soils of the Country round Stranraer and Wigtown. (Sheets 1 - 4 and part 7)	£36.00	
The Soils of Carrick and the Country around Girvan (Sheets 7 & 8)	£36.00	
The Soils of the Country round Jedburgh and Morebattle (Sheets 17 & 18)		
The Soils of the Country round Kilmarnock (Sheets 22 & part 21)		
The Soils of the Country round Kelso and Lauder (Sheets 25 & 26)		
The Soils of the Country Haddington and Eyemouth (Sheets 33, 34 & part 41)	£30.00	
The Soils of the Country round Perth, Arbroath & Dundee (Sheets 48 & 49)		
The Soils of the Country round Aberdeen, Inverurie & Fraserburgh		
(Sheets 77, 76 87 & 97) The Soils of the Country round Banff, Huntly and Turriff (Sheets 86 & 96)		
The Soils of the Black Isle (Parts of Sheets 83, 84, 93 & 94)	£36.00	
The Soils of the Country round Wick (Sheets 110 & 116)	£36.00	
Report No.1 Soils in Easter Ross	£9.00	
Report No. 2 The Soils of Orkney	£9.00	
Report No. 3 Soils of the Blairgowrie District	£9.00	
Report No. 4 The Soils of Caithness	£9.00	
Report No. 5 Soils around Glasgow and the Firth of Clyde	£9.00

Economic and Policy Series No. 1

fibre production and fibre processing.

Evaluation of the Farm Woodland Premium Scheme. Ed. Bob Crabtree

Owners' and Breeders' Association. Chapters on camelid feeding, breeding, health,

£12.00

£6.00

- Characteristics of planting under the scheme
- Costs to farmers associated with planting
- Biodiversity, landscape and other environmental benefits from planting
- Advice, delivery and administration of the scheme
- Analysis of policy measures for fauna woodlands

Economic and Policy Series No. 2

Valuation of the Conservation Benefits of Environmentally Sensitive Areas Ed. Douglas MacMillan.

This publication quantifies, in monetary terms, the conservation benefits of two ESA's, Breadalbane in Highland Perthshire and the Machair Lands of the Western Isles. Benefits measured were to visitors, to local residents and to the general (UK) public using the Contingent Valuation Method.

£12.00

OTHER PUBLICATIONS (cont.)

Sewage Sludge Utilisation on Agricultural Land in Scotland - Trends in the physical Constraints and their Implications Price £12.00

The Potential for Native Woodland in Scotland.

Available as digital data or as a 60 page book with data CD ROM, published jointly with Scottish Natural Heritage.

Price £27.00

Please contact products@hutton.ac.uk to order the digital data, or the book.

EUROPEAN FINE FIBRE NETWORK PUBLICATIONS

Occasional Publications No. 3 - The Nutrition and Grazing Ecology of Speciality Fibre producing animals

Ed. J. P. Laker & A. J. F. Russel

Reviews knowledge on the influences of nutrition on fibre growth and production in sheep, angora and cashmere goats and the South American Camelids. Free of charge but £5.00 postage

Occasional publications No. 4 - Metrology and Identification of Speciality Animal Fibres

Ed. J.P. Laker & F. J. Worthman

This book is the proceedings of a conference jointly organised by the European Fine Fibre Network and the German wool Research Institute which reviewed recent technological advances in the identification, measurement and characterisation of speciality fibres. Free of charge but £5.00 postage.

INTERNATIONAL FEED RESOURCE UNIT PUBLICATIONS.

Protein Nutrition in Ruminants

The book, which is now in the second edition, was written in response to many changes in the concept of protein nutrition in ruminants and many of the changes were a result of the work carried out at the Rowett Institute. The book discusses the science and practical implications of the new concepts of protein nutrition in ruminants.

£18.00

Energy Nutrition in Ruminants

This book is written with objective of bringing together recent knowledge in the sciences of microbiology, physiology, metabolism and feed evaluation pertaining to the energy nutrition of ruminants.

A new feed evaluation system is suggested: it is based on the dynamics of feed degradation, and also predicts feed consumption. It is argued that present feed evaluation systems have little relevance in production systems based on poor-quality roughages, in which voluntary intake is of paramount importance
£12.00

The Feeding of Ruminants - Principles and Practice

The principles and practice of the feeding of ruminant livestock are described in a way that is understood by all. The guide explains clearly what is involved in feeding the new-born animal, the fermentation in the rumen and how to optimise it, the preservation and processing of feeds for best use by both the rumen microbes and the animal itself and how to meet the requirements of productive ruminants for energy, protein and minerals.

£18.00

Reality in Rural Development Aid - with emphasis on livestock

In this book Dr. Ørskov shares some of his experience and thoughts from his vast experience in identifying, evaluating and executing projects in many developing countries. Dr. Ørskov uses examples of livestock projects to demonstrate how apparently well-intentioned aid can hinder and often have negative effects on the receiving country. The problems are often the result of 'perceived normality' and secondary interests. Dr. Ørskov explains how well meaning experts from developed countries fail to understand different cultures and thus are unable to perceive that what is normal in their own country is not appropriate, or even helpful, as a goal for other countries to aspire towards.

Estimation of Microbial Protein Supply to Sheep and Cattle based on Urinary Excretion of Purine Derivatives:

An overview of the technical details X.B. Chen and M.J. Gomes (1992) £2.40
