

# Hutton Hub

The James  
**Hutton**  
Institute

The James Hutton Institute, Craigiebuckler

**The multi-million-pound development offers a space for academics, businesses and the public to collaborate and use cutting-edge technology to help the north-east achieve a Just Transition to Net Zero.**

Financed by the Scottish Government's Just Transition Fund, the Macaulay Development Trust and the UK Department for Science, Innovation and Technology, the Hutton Hub features top-of-the-range technology and facilities which are open to hire for businesses and the public.

Included in these new facilities are:

- A 360-degree Immersive Suite equipped with a media server, games engine and surround sound - allowing for videos, graphics, models and simulated environments to be projected on all four walls
- A café where members of the public can drop by to grab a coffee and learn more about the Hutton's research
- VR and augmented reality headsets
- Touch tables
- An eye tracker
- A podcasting, video and sound editing suite
- Two spacious lecture theatres perfect for holding conferences and events

As recipients of Scottish, UK and international funding, the Hutton's research places the UK at the forefront of innovative solutions to pressing global challenges such as energy and environmental security whilst supporting the national economy. With the next decade expected to be pivotal in addressing the challenges of climate change mitigation, the Hutton is dedicated to creating high-tech, hireable facilities where businesses can work together to tackle the most pressing issues presented by the climate and nature crises.

For more information about any of the venues or to book your conference or to enquire about renting space, please contact:
